Voice amplifier

Model No.
SR 324 SmallTalk

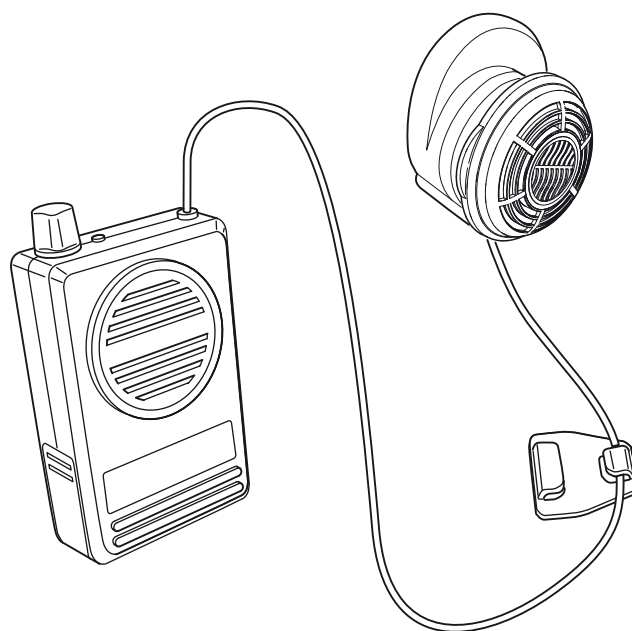

Ordering No.
T01-1217

Product Description

The Voice Amplifier SR 324 is a communication accessory for the Sundström half masks and full face masks respirators. The microphone is mounted onto the exhalation valve seat of the respirator. The pocket-size loudspeaker can be clipped onto a breast pocket or waist belt. The SR 324 is designed to withstand temperature, vibration, impact, dust and spray. It is water resistant, however, do not subject it to running water, and do not immerse it in water. When used in accordance with user instructions, the respirator continues to provide full protection.

Technical specification

SR 324	
Battery (not included)	9V IEC 6LR61
Microphone	ELECTRET
Loudspeaker	50 mm Mylar cone, 8 Ohm, 2 Watt
Dimensions	64 x 96 x 35 mm
Weight without battery	≈ 160 g
