

Product Remote filter holder	Model No. SR 905	Ordering No. T01-3009
--	----------------------------	---------------------------------

Product Description

The SR 905 is a remote filter holder that, together with the APR half mask SR 900 and breathing hose SR 951 or SR 952, is included in the Sundström respiratory protective device systems. The remote filter holder is to be equipped with filter(s). The air is inhaled through the filter and breathing hose to the half mask.

The SR 905 is intended to be used in the same environments as a Sundström half mask SR 900. This gives you greater freedom of movement, less weight, and the half mask will be smaller to its size, which makes it possible to use under visors.

Filters/cartridges to the SR 905 is the same that is used together with half mask SR 900.

The belt attachment mounts in the users own belt. Other belt options are available as accessories.
