

Our sustainability goals for 2023

Working with sustainability is a natural part of Sundström’s business. We want a high ethical and responsible level throughout our value chain, where people and the environment are respected and appreciated. Our sustainability goals for 2023 are linked to our social responsibility and environmental responsibility.

STAFF & HEALTH

GOAL for 2023:

- Review the action plans for sexual harassment and abusive discrimination.
- Educate managers and supervisors in the company's guidelines and routines for handling sexual harassment and abusive discrimination cases.
- Implement environmental law system for work environment issues.

ENVIRONMENTAL IMPACT

GOAL for 2023:

- Reduce pure energy consumption by more than 3% per million turnover (SEK)*.
- * compared to 2022
- Analyse our product packaging from an environmental perspective.
- Inventory the packaging used to our products.

OUR SOCIAL RESPONSIBILITY

GOAL for 2023:

- Carry out a preliminary study regarding opportunities for trainee program.
- Communicate our sponsorship policy (internally and externally).

SUSTAINABLE PRODUCTS

GOAL for 2023:

- Calculate the carbon footprint for at least two products.

Based on our business and the company’s words of values “Openness, Clarity and Respect” we have chosen to work with five of the global goals, where we see that we can make the biggest difference.
